NOTE. The extent to which the figures shown in this publication have been affected by the incorporation of supplementary payments in the Metal Industry Award, Part 1, has been calculated; figures which will allow users to adjust the series to exclude the effects of the supplementary payments are available on request.

I. WAGE RATES INDEXES

1. This section contains particulars of weighted average minimum weekly and hourly wage rates for adult males and adult females for Australia and each State, together with index numbers with base : year 1954 = 100. Less detailed statistics are first published in the monthly statement, *Wage Rates Indexes (Preliminary)* (6311.0).
2. The wage rates used in the compilation of the indexes are the lowest rates for a full week's work (excluding overtime) prescribed for particular occupations. In the majority of cases the rates are prescribed in awards or determinations of Federal or State industrial authorities or in collective agreements registered with them. Rates prescribed in unregistered collective agreements are used where these are dominant in the particular industries to which they refer.
3. The Wage Rates Indexes are based on the occupation structure existing in 1954. Weights for each industry and each occupation were derived from two sample surveys made in that year. The first was the Survey of Awards in April 1954, which showed the number of employees covered by individual awards, determinations and collective agreements, and provided employee weights for each industry as well as a basis for the Survey of Award Occupations made in November 1954. This second survey showed the number of employees in each occupation within selected awards, etc. in the various industries, thereby providing occupation weights. Revised indexes based on more up to date weighting patterns are being developed.
4. The minimum wage rates used in the indexes are for representative occupations within each industry. They have been derived entirely from representative awards, determinations and collective agreements in force at the end of each period commencing with March 1939 for adult males and March 1951 for adult females. The current index for adult males includes rates for 3,415 award designations prescribed in 501 awards, determinations and collective agreements. As some of these designations are operative within more than one industry, or in more than one State, the total number of individual award occupations is 2,313. For adult females the corresponding numbers are 1,100 award designations, 187 awards, etc. and 515 individual award occupations. Some awards included in the indexes are regarded as "paid rates" awards. By use of the industry and occupation weights derived from the surveys described above, these rates were combined to give weighted averages for each industry group for each State and Australia. Because of coverage difficulties the rural industry is not included in the indexes. A list of the major awards used in the compilation of the wage rates index for adult males, together with explanatory notes, was shown in the July 1974 and August 1974 issue of this publication. The industry weighting pattern of the indexes is shown on page 80 of *Labour Statistics, 1975* (6101.0).
5. Because the indexes are designed to measure movements in prescribed minimum rates of "wages" as distinct from "salaries", those awards, etc. which relate solely or mainly to salary earners are excluded. Thus awards relating to employees in the Finance and Property industry group (banking, insurance, etc.) are excluded as are awards relating to occupations such as engineers, scientists, architects, teachers, nurses, etc. and to administrative employees in government services. Some awards that specify annual rates of pay for certain occupations mainly in government employment (for example, mail officers, postal officers, drivers, linemen, telecommunications technicians, clerical assistants, office machine operators, typists, telephonists, etc.) are included.
6. The rates for particular occupations used in the indexes are prescribed in awards, determinations and collective agreements as set out in paragraph 2 above. Relevant rates of prescribed minimum wages for adult males and adult females (see page 18) are used when applicable. For some occupations general loadings of various kinds are included. Loadings, etc. that are not applicable to all workers in a specified award occupation (for example, those payable because of length of service; working in wet, dirty or confined places; excess fares incurred due to location of building site) are not included in the wage rates indexes. Annual leave loadings, prescribed in many awards, etc., are not included in the wage rates indexes. The ten per cent additions to minimum wage rates for adult males first prescribed in some Western Australian State awards in October 1970 are included in the wage rates. The weekly rates used in the index for occupations specified in the National Building Trades Construction Award include the weekly base rate of pay, the special allowance and the industry allowance. From September 1978 the indexes include supplementary payments under the Metal Industry Award, Part 1, applicable in all States except Western Australia. In Western Australia, similar payments under the corresponding award, the Western Australian Metal Trades Award (General), have been included since January 1976.
7. In recent years the award rates of pay for some government employees have been based on actual rates of pay for employees in the private sector, which include over-award payments, loadings, etc. Thus award rates of pay for government employees in certain occupations will be higher than those for private employees in comparable occupations. This may affect the relative levels of the weighted average minimum wage rates in industry groups which have a large component of government employees (for example, the Communication group).
8. The indexes are designed to measure trends in wage rates in current awards, etc. excluding the effects of changes in the relative importance of industries, awards and occupations. The weighted average wage

rates shown in the tables in this section are therefore indexes expressed in money terms, and do not purport to be actual current averages. Similarly, neither these weighted average wage rates nor the corresponding index numbers measure the relative levels of average current wage rates as between States or industries.

9. Since 1954 the industrial structure in Australia has undergone changes which are likely to have had some effects on the representativeness of the regimen of the indexes. These effects are mitigated because occupations in new or expanding industries are often covered by existing awards and the wage rates for new occupations usually conform very closely to those for existing occupations. Also, where an entirely new award has been made and the number of employees affected has warranted such action, occupations from the new award have been introduced into the indexes. These latter cases have not been of great significance.

10. Weighted average minimum weekly wage rates for adult males and adult females covered by "Federal awards, etc." and for those covered by "State awards, etc." (as defined below) are shown separately in Tables 8 and 15. The wage rates for these two categories may change at any time as a result of the transfer of particular awards or occupations from one jurisdiction to another.

Relevant definitions are as follows :

"Federal awards, etc." include awards of, or collective agreements registered with, the Australian Conciliation and Arbitration Commission and the Coal Industry Tribunal, and determinations of the Australian Public Service Arbitrator.

"State awards, etc." include awards or determinations of, or collective agreements registered with, State industrial tribunals together with certain unregistered collective agreements where these are dominant in the particular industries to which they refer.

11. The proportion of employees covered by Federal and State awards, etc. varies considerably between States. In addition, the proportions of employees engaged in the respective industries and occupations differ from State to State. As a result there may be relatively wide differences between the weighted average wage rates in the several States.

12. In some cases, when awards etc. are varied, the new wage rates are made retrospective. Also there is generally an unavoidable, and sometimes considerable, delay in the receipt of notification of changes in wage rates in respect of the occupations included in the indexes. Because of these delays, etc., figures for the latest twelve months are subject to revision. As such revisions are made they are published in the normal monthly tables of this bulletin. Considerations of space preclude the publication herein of revised figures for each industry group in each State but these are available on request.

13. A table showing the distribution of weekly wage rates included in the wage rates indexes, the weighted averages and medians of the indexes, and the proportion of index weights for wage rates equal to the various minimum wages, for December 1978 was published in the bulletin *Wage Rates Indexes, December 1978 (Preliminary)* (6311.0).

14. The titles of a number of the industry groups shown have been abbreviated due to lack of space.

Related publications

15. Wage rates and index numbers for adult males are available as at the end of each quarter from March 1939 to December 1956 and as at the end of each month from January 1957. Particulars for adult females have been compiled quarterly from March 1951 to June 1967 and monthly from July 1967. For details of wage rates and index numbers from 1939 reference should be made to the following bulletins:

Minimum Wage Rates, March 1939 to June 1965 (6313.0).

Wage Rates Indexes, June 1965 to June 1968 (6314.0).

Wage Rates Indexes, June 1968 to June 1972 (6314.0).

Wage Rates and Earnings, June 1976 (6312.0) for final figures July 1972 to June 1975.

Figures subsequent to June 1975 will be found in the July 1976 and later issues of this bulletin, and in the July 1976 and later issues of the monthly statement *Wage Rates Indexes (Preliminary)* (6311.0).
